

Shuffle Card

Project is organized as a standard Maven project with very few external dependencies. To run the basic build and execute unit tests run

```
mvn clean compile
```

To generate PMD, JUnit and Cobertura code coverage reports run

```
mvn site
```

Open index.html at

```
target/site/cobertura/index.html
```

One PMD warning has been purposely left in the code to ensure that the PMD report is generated.
